Asier Bayón

Profile

Design-minded front-end developer who relies on a passion for learning, acute attention to detail and effective communication to deliver exceptional results. My mission is to find a programmer internship that maximizes my opportunities for growth and skill development through working with an outstanding team!

Featured Project

Medieval Fantasy

HTML platform game with 3 levels where the player, a knight, in order to finish the game has to defeat the final boss from each level while killing the enemies that run after him.

Tech stack: JavaScript, HTML, Canva2D, CSS.
